

glgate
1% of heads cross $\epsilon=0.3$

sigmoid
89% of heads cross $\epsilon=0.3$

textinit
87% of heads cross $\epsilon=0.3$

birth-map
(step a head first
crosses $\text{attn} \rightarrow \text{pos0} > 0.3$)

baseline: 0 % of heads
ever cross $\epsilon=0.3$

RF (fresh): 0 % of heads
ever cross $\epsilon=0.3$

→ the concentration sink
never forms from random
init (repeated OR fresh).
